SRC = Yikes Hottest, US \$ 100 for a PDF? I now realize that     one s    rie PDFs, letter files   o, tokens, etc., but \$ 100     much of a price tag asking. Maybe \$ 50 I would understand, but the barrier to entry that was to be downloaded by coloc i them as PDFs- Only got stronger. With printing costs   alone, the actual price tag will skyrocket much higher than that. Thoughts? Any other PDF products like pre sos models? The game is worth the note C? I get the phasic cost. But 100 for PDFs? N    o sure of the value, but the US in   think I could honestly, as a lot of invisible sun, I get the   sensa s  the that if the price tag excites you, You do   ESTA  n the target market; A     the Exclusion intentionally. As for whether it is worth, I know the   nA. The price hung me. Ouch! US in the   think I'd be interested in the printed version   for that price tag, unless it came highly recommended from Algua   m I trust and I was sure that I had a group ready to play. But looking around,     almost a luxury item of prestige. I certainly in   o     the target market for this. Wow. I never played, but as well   m never seen a price tag like that. You got in touch and asked if an error digita s  the  ? Honestly, looking how much material there, \$ 100 seems fair. If you derrub i it into main se s  es, may seem more; \$ 12 per pdf for each of the four books of 150 pages. \$ 15 for the PDF art book. \$ 15 for 1,000 WIFI ADSL that s    o       used as reminders, I guess? US in  m clear whether their material exists elsewhere. \$ 4 each for South deck, GM Notebook, Invisible Sun application, preɡens car  ter and poster maps. \$ 5 for the   assortment of brochures. The     trick, the fact that     Necessary it is Necessary for the game     what excites me. 600 pages of rules, wing   m thousand letters to spells and m gicos and special items and the like relics? H i a lot of things there that packaged n    o     really Necessary for the game, Tamba   m - the art book, maps, brochures, app, notebook and so on. It would be great if there was a version   the \$ 40 game that was much more acess vel. The price n    o     one digita  s  error   o, the same price tag was at the site When they were showing the black box and the PDF orders for the first time. Keep in mind that the printing version of this game is \$ 250. A 60% discount on a PDF looks at a normal range for a game, is only the price of this price   much larger than a normal book of \$ 40 / \$ 15 pdf that you Watch. There are no incentive for customers to buy the complete printing product if you discount the digital product very strongly. Remember, many publishers do not want to discount digital versions of their content only for that reason. I did not see the game, so I can not comment a path or another on it. I have to say that if the game has cards, tokens, etc and was made for a face face to face instead of an online / discord game, I would buy the complete box. If this was not available, there would be no way I can get through the effort to get a PDF and have to print / prep all alone. So, for me, the invisible sun would be the physical black box or nothing. As much as the price goes, \$ 100 does not look too much for me. People are depending more than for video games. Want a reinforced version of Digital Deluxe from Call of Duty? \$ 130 dollars. And this is not the edition of the collector, nor does it include microtassions. Well, product description indicates that it is composed of 80 separate files, four of which are books. Then it looks more like an opposition package to a book. Parallel, I just discovered that you can sign up to spend \$ 216 to get a directed campaign where Monte Cook personally projects an invisible sun campaign for your group and sends ideas and plotting hooks, and more Your players. That's ... one thing, I wonder if anyone else did it? Parallel, I just discovered that you can sign up to spend \$ 216 to get a directed campaign where Monte Cook personally projects an invisible sun campaign for your group and sends ideas and plotting hooks, and more Your players. That's ... one thing, I wonder if anyone else did it? Good idea! But I can lower it. For \$ 215.95 I will send IAS, plotting books and history messages. Do you think Monte Cook's Prestige RPG is just a no more than yours? OK, so what is the cost for the physicial version? \$ 500? Looking at what you get, I think this amount of material is probably worth the price, if all I wanted. But still is too much for me to pay him - and I would not like all this. I hope it becomes possible to take it and cheaper. OK, so what is the cost for the physical version? \$ 500? At the moment, no fanisical versions are for sale. I'm wondering if it's to help preserve the "value" for people who bought the physical version. More or less how Apple does its best not to devalue your Mac line blowing completely last year and last year last year with this year. Also: data production costs to write, edit, art, etc., I think it is fair to ask so much. I'm sure the hell will not pay the vision unnoticed so (I like the collapse by item listed previously), but I will not regret it. \$ 100 is also too much for a PDF of a game that has been as little detailed about it. It seems that the game is intentionally cloudy, and I will not cut a lot of money on the chance, it can be interesting and not a Kult reh h, about the exists of Edge or Unknown I think people were so much o Used for Bashkitting RPGs, we are hardly ready for Volkswagen. People have no idea what it also does when confronted with the fact that our hobby can now support Lamborghinis. I have a similar borrower about lexocultum - looks beautiful and painfully adequate for me, but it's   38.50 for the two main books in pdf .. I'm kind of happy that we are seeing games "premium" in the market. After all, the other end of the spectrum - Gobs of free things and PWYW - is well covered. People leave at extravagant dinners and buy expensive bags and pay hundreds of dollars for select drink, so why should not people be able to spend big on rpgs? I wonder what game requires an initial investment so great. Someone here The art is good, but the premise seems very similar to Kult, which also received a new recent and less expensive edition. I need Large amount of material premium-visualization before I have something with this sale quotation. \$ 100 is also too much for a PDF of a game that has been as little detailed about it. It seems that the game is intentionally vague, and I will not slow down so much money in the off chance that could be interesting and not a repetition of Kult. Over the Edge or Exchange no informed I see this point of view (which Invisible Sun is this, mysterious unknown amount) a lot and I do not understand. There are at least three full playthroughs on YouTube, each in many parts for many hours. They go through the system and the configuration very well. One of them is 7 gmed sessions by Monte Cook and interpreted by some team members, others are some relatively prominent Youtubers RPG. Search Invisible game Sun on YouTube. In addition, there are many, many articles on the game and opinions that on the web. Google Sun Invisible Sun or Invisible Sun System. If you want to know about this, Thrones Thers of information about it. I recently ordered a heavily discounted Copia from the CoolStuffinc based on the large amount of information I was able to quickly and easily find. Page 3 It's not really a terrible business for four books plus all other things inside. The text on the 1000 cards mentioned earlier is not duplicated in other parts of the text, in my opinion, although I have not had the opportunity to go through all the PDFs to verify yet. Now, I do not personally spend \$ 100 on any type of PDF package, but this is because PDFs really only exists for me as an aggregate value for a physical game of the game. While I wait for mine to be delivered from the second Kickstarter, I am happy to have the PDFs to read, especially as one of my groups will be starting a campaign in the next week. Honestly, looking for how much material exists, \$ 100 looks fair. If you knock it on main sets, it may seem more: \$ 12 per pdf for each of the four 150 page. \$ 12 for PDF art book. \$ 15 for the 1,000 cards that are used        
